For rankings regarding wealth, see List of sovereign states by wealth inequality or list of countries by wealth per adult. 44273603eb == OECD countries with a wealth tax == 44273603eb It is a discipline that involves structuring and planning wealth to help grow, preserve, and protect it, while also passing it on to the family in a tax-efficient manner and in accordance with their wishes. Wealth management brings together tax planning, wealth protection, estate planning, succession planning, and family governance. 44273603eb Typically, wealth taxation involves excluding an individual's liabilities, such as mortgages and other debts, from their total assets. Accordingly, this type of taxation is often referred to as a net wealth tax. As of 2017, five of the 36 OECD countries had a personal wealth tax (down from 12 in 1990). Proponents argue that wealth taxes can reduce income inequality by making it harder for individuals to accumulate large amounts of wealth. Wealth taxes have been criticized because they reduce economic growth, disincentivize entrepreneurship, encourage capital flight, and raise little revenue despite their high administrative costs. 44273603eb Some sovereign wealth funds may be held by a central bank, which accumulates the funds in the course of its management of a nation's banking system; this type of fund is usually of major economic and fiscal importance. Other sovereign wealth funds are simply the state savings that are invested by various entities for investment return, and that may not have a significant role in fiscal management. 44273603eb

In nations where wealth is highly concentrated in a small percentage of people (a higher Gini % in the tables below), the mean (obtained by dividing the total aggregate wealth by the number of adults) can be much higher than the median (the amount that divides the population into two equal groups). From Investopedia: "Wealth distribution often results in higher Gini coefficients compared to income distribution, reflecting more pronounced inequality in wealth even in affluent countries." 44273603eb Although different from income inequality, the two are related. Wealth is usually not used for daily expenditures or factored into household budgets. However, combined with income, it represents a family's total opportunity to secure stature and a meaningful standard of living, or to pass their class status down to their children. Moreover, wealth provides for both short- and long-term financial security, bestows social prestige, contributes to political power, and can be leveraged to obtain more wealth. Hence, wealth provides mobility and agency—the ability to act. Accumulating wealth enables a variety of freedoms and removes limits on life that one might otherwise face. 44273603eb The Global Revenue Statistics Database presents a roster of countries with documented instances of wealth-tax revenue (the... 44273603eb == Median and mean wealth (UBS). 2025 data. Wealth A person possessing a substantial net worth is known as wealthy. This Wealth is the abundance of valuable financial assets or physical possessions which can be converted into a form that can be used for transactions. This includes the core meaning as held in the originating Old English word weal, which is from the Indo-European word stem, wel-, meaning "to wish" or "good". Net worth is defined as the current value of one's assets less liabilities (excluding the principal in trust accounts). The modern concept of wealth is of significance in all areas of economics, and clearly so for growth economics and development economics, yet the meaning of wealth is context-dependent.
