Cheng, A. ; Field flattener lens is a type of lens used in modern binocular designs and in astronomic telescopes to improve edge sharpness

Field flattener lenses counteract the Petzval field curvature of an optical system, mitigating the field-angle dependence of the focal length of a system. The mountain Mount Hoegh in Antarctica is named in his honour.

Emil von Höegh pp. "Celor Lens. He left the company in 1902. Emil von Höegh (10 May 1865 – 29 January 1915) was an optical lens designer, known for inventing the first double anastigmatic camera lens called Dagor in 1892.
