Epilogism at insight on the relations between pleasure and pain, desire, and happiness through an assessment of our own sense experience, preconceptions and feelings Epilogism (ἐπίλογισμός; lit. It was used by Epicurus in his discussions of the philosophy of time, and also as a justification for his theory of psychological hedonism. "appraisal" or "assessment") is a theory-free method of inference used in Ancient Greek philosophy and Ancient Greek medicine in order to arrive at insight without deductive reasoning or inference based on unobservables, relying solely on reflection of what is already both visible and evident. In the Empiric school of medicine, it was one of the three main sources of knowledge, along with direct observation and the study of observations made by others 93f231a1f0

The most common childbirth method worldwide is vaginal delivery. It involves four stages of labour: the shortening and opening of the cervix during the first stage, descent and birth of the baby during the second, the delivery of the placenta during the third, and the recovery of the mother and infant during the fourth stage, which is referred to as the postpartum. The first stage... 93f231a1f0

Burning mouth syndrome People with burning mouth syndrome may also have a subjective xerostomia (dry mouth sensation where no cause can be found such as reduced salivary flow), paraesthesia (altered sensation such as tingling in the mouth), or an altered sense of taste or smell. Symptoms of BMS are variable, but the typical clinical picture is given below, considered according to the Socrates pain assessment method (see table) Burning mouth syndrome (BMS)

Pain due to insufficient blood flow to the heart is also called angina pectoris. Those with diabetes or the elderly may have less clear symptoms. 93f231a1f0

Neurological disorder These disorders affect the brain, spinal cord, and nerve networks, presenting unique diagnosis, treatment, and patient care challenges. of symptoms include paralysis, muscle weakness, poor coordination, loss of sensation, seizures, confusion, pain, tauopathies, and altered levels of consciousness Neurological disorders represent a complex array of medical conditions that fundamentally disrupt the functioning of the nervous system. At their core, they represent disruptions to the intricate communication systems within the nervous system, stemming from genetic predispositions, environmental factors, infections, structural abnormalities, or degenerative processes 93f231a1f0
