Simulation This definition includes time-independent simulations. Such simulations are typically based on stochastic asset models A simulation is an imitative representation of a process or system that could exist in the real world. Another way to distinguish between the terms is to define simulation as experimentation with the help of a model. Sometimes a clear distinction between the two terms is made, in which simulations require the use of models; the model represents the key characteristics or behaviors of the selected system or process, whereas the simulation represents the evolution of the model over time. Often, computers are used to execute the simulation. simulations, portfolio simulations, risk management simulations or models and forex simulations. In this broad sense, simulation can often be used interchangeably with model 5cd479fcb0
