Despite common misconceptions, $0.999\ldots$ is not "almost exactly 1" or "very, very nearly but not quite 1"; rather, " $0.999\ldots$ " and "1" represent exactly the same number. 0e54ffa1c1

Formative assessment It typically involves qualitative feedback (rather than scores) for both student and teacher that focuses on the details of content and performance. In that sense, formative Formative assessment, formative evaluation, formative feedback, or assessment for learning, including diagnostic testing, is a range of formal and informal assessment procedures conducted by teachers during the learning process in order to modify teaching

and learning activities to improve student attainment. It is commonly contrasted with summative assessment, which. It also helps faculty recognize where students are struggling and address problems immediately. solving makes it possible for teachers to help their students overcome conceptual difficulties and, in turn, improve learning. The goal of a formative assessment is to monitor student learning to provide ongoing feedback that can help students identify their strengths and weaknesses and target areas that need work 0e54ffafc1
